United States-Japan Cooperative Program in Natural Resources (UJNR)

Aquaculture Panel

30th Panel Meeting

Mote Marine Laboratory
Sarasota, Florida

December 1 - 8, 2001

ECOLOGY OF AQUACULTURE SPECIES AND ENHANCEMENT OF STOCKS

You are invited to participate in the 30th United States-Japan Cooperative Program in Natural Resources (UJNR) Aquaculture Panel Meeting held December 1-8, 2001 starting at Mote Marine Laboratory in Sarasota, Florida.

Format and Topics:

The primary focus will be on marine stock enhancement and balanced ecosystem approaches to aquaculture. The UJNR business meeting and scientific symposium will take place at the Mote Marine Laboratory in Sarasota, Florida and will be followed by field trips and site visits in the Central Florida area.

The purpose of the UJNR Aquaculture Panel is to build scientific and technical cooperation in aquaculture between Japan and the United States. Many participants in prior UJNR meetings have found this scientific and cultural exchange to be one of the highlights of their professional careers.

The professional connections that come from this program have led to many long-term collaborations, which have not only improved relations between the United States and Japan but have led to many significant scientific advancements. This meeting provides an excellent opportunity for viewing the unique aquaculture facilities of Florida and exchanging ideas with colleagues from both sides of the Pacific. We are confident you will find your investment extremely beneficial for your organization and yourself.

Location and Accommodations:

The UJNR business meeting will be held at Mote Marine Laboratory, 1600 Ken Thompson Parkway, Sarasota, Florida. A block of hotel rooms have been reserved at the Helmsley Sandcastle Hotel, 1540 Ben Franklin Drive, Sarasota, Florida (see enclosed brochure) at \$80 per night. Additional hotel rooms will be reserved for those interested in attending the field trips.

Please make hotel reservations between the hours of M-F 9:00-5:00 pm, by calling the Helmsley at either (800)225-2181(US) or (941)388-2181 (Japan) or by fax (941)388-2655. Specify that you are attending the UJNR Panel Meeting when making your reservations in order to receive the special room rate. Reservations must be made by **November 15th**. Any reservations not guaranteed with the hotel will not be held beyond 6:00 pm on the arrival day without verification of arrival time.

Registration Information:

An early registration fee of \$225, will include refreshments, lunches, receptions, and transportation from the hotel to the meeting site. Early registration DEADLINE is November 1, 2001!
Registration fee November 2-30, 2001 \$275
Onsite registration \$300

Social Events:

Field trip costs including lunches and refreshments are estimated to be about \$250. Other food costs (breakfast and dinner) should be reasonable; they will range between \$30 and \$50 per day, depending on your tastes.

** Each participant should understand that he/she is responsible for all meeting costs.*

Abstracts/Deadline:

Under the theme of "Ecology of Aquaculture Species and Enhancement of Stocks", we are particularly interested in presentations that focus on new aquaculture work in the areas of population dynamics, community structure, primary production, carrying capacity, genetic population management, and habitat development.

Prospective presenters should submit abstracts no later than **October 15, 2001**. Presenters are asked to submit a hard copy and electronic version (HTML preferred) at the meeting. Presentations will then be compiled into a NOAA Technical Report.

If you are interested in participating at the 30th UJNR Aquaculture Panel Meeting, please contact:

Ken Leber: (941)388-4441 ext. 406
kleber@mote.org

If you are interested in presenting, please contact:

Dominic Preiswerk: (301)713-2469 ext. 166
Dominic.Preiswerk@noaa.gov

The 30th UJNR Aquaculture Panel Meeting will follow the **Second International Conference on Marine Ornamentals**, to be held November 26-December 1, 2001 in Lake Buena Vista, Florida, USA. More information about this conference can be found through Florida Sea Grant at:
